Algebraic Geometry and Singularities How to fold up space

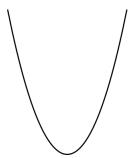

Matt Booth

FST Forum, 15 March 2023

Algebraic geometry

Algebraic geometry

The geometry...

Algebraic geometry

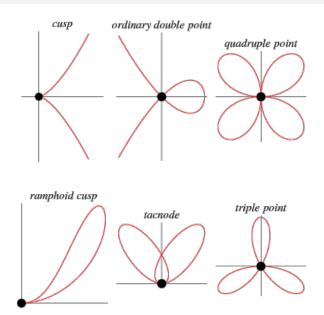

The geometry...

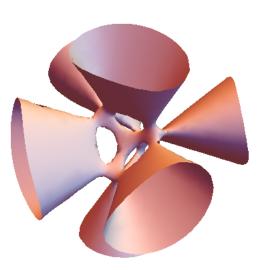

of algebraic equations

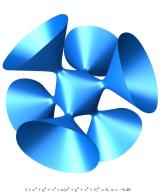

$$y = x^2$$

More curves

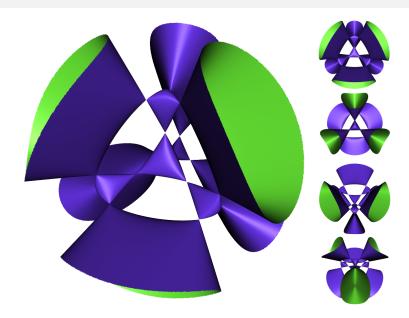

K3 surfaces

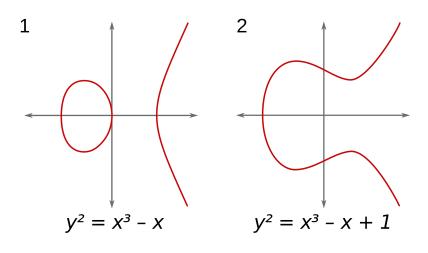

a Kummer surface

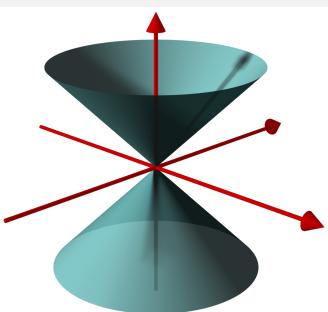

Application: Elliptic curve cryptography

Application: Elliptic curve cryptography

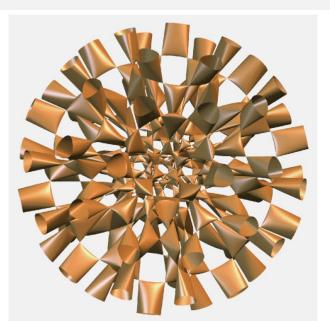

Singularities

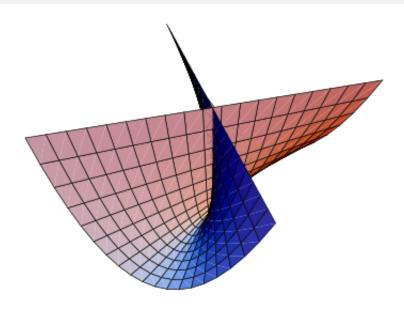

Singularities

a Sarti surface

the Whitney umbrella

Some of my research

 Study singularities via methods from other parts of mathematics - homological algebra, representation theory, homotopy theory

Some of my research

- Study singularities via methods from other parts of mathematics - homological algebra, representation theory, homotopy theory
- Application to the classification of three-dimensional varieties

Some of my research

- Study singularities via methods from other parts of mathematics - homological algebra, representation theory, homotopy theory
- Application to the classification of three-dimensional varieties
- Interactions with deformation theory

Thanks for listening!
